

AGU 2019 Fall Meeting

# Enhancing the Spatial Resolution of Diurnal LST from Geostationary Satellites

**Panagiotis Sismanidis, Iphigenia Keramitsoglou, Chris T. Kiranoudis**

Institute for Astronomy, Astrophysics, Space Applications and Remote Sensing  
National Observatory of Athens, Greece

**Glynn Hulley**

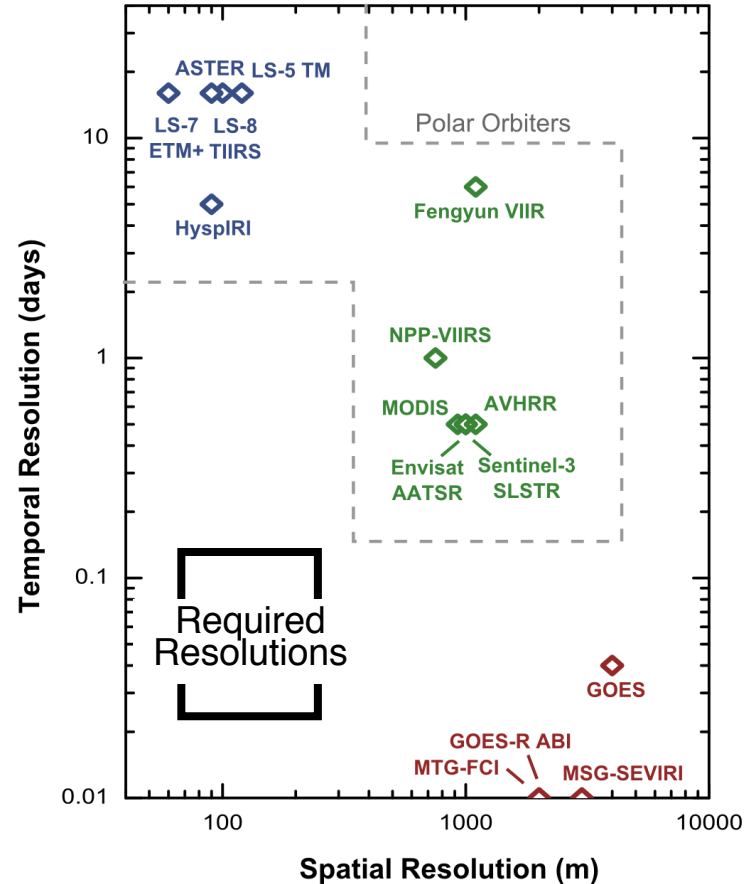

Jet Propulsion Laboratory  
National Aeronautics and Space Administration, USA

# Resolution Trade-off

Satellites **cannot** acquire data that combine high spatial and temporal resolution

We need a spatial resolution of approximately **100 m**

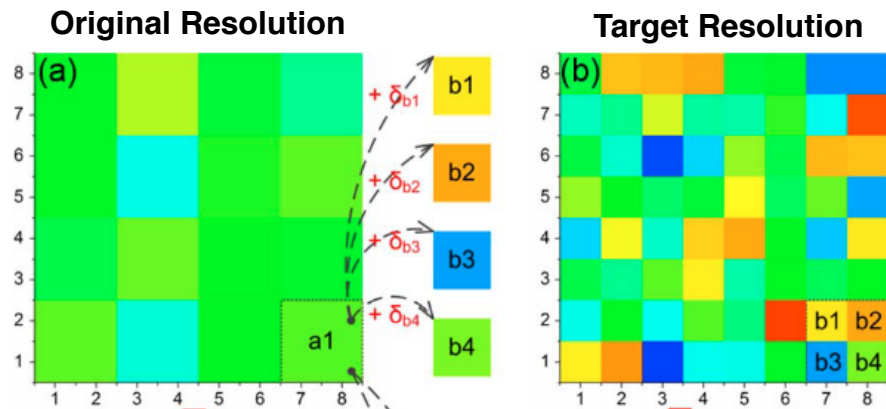

And a temporal resolution of approximately **1-2 h**

# LST Downscaling

Statistical downscaling **disaggregates** coarse-scale LST to its components

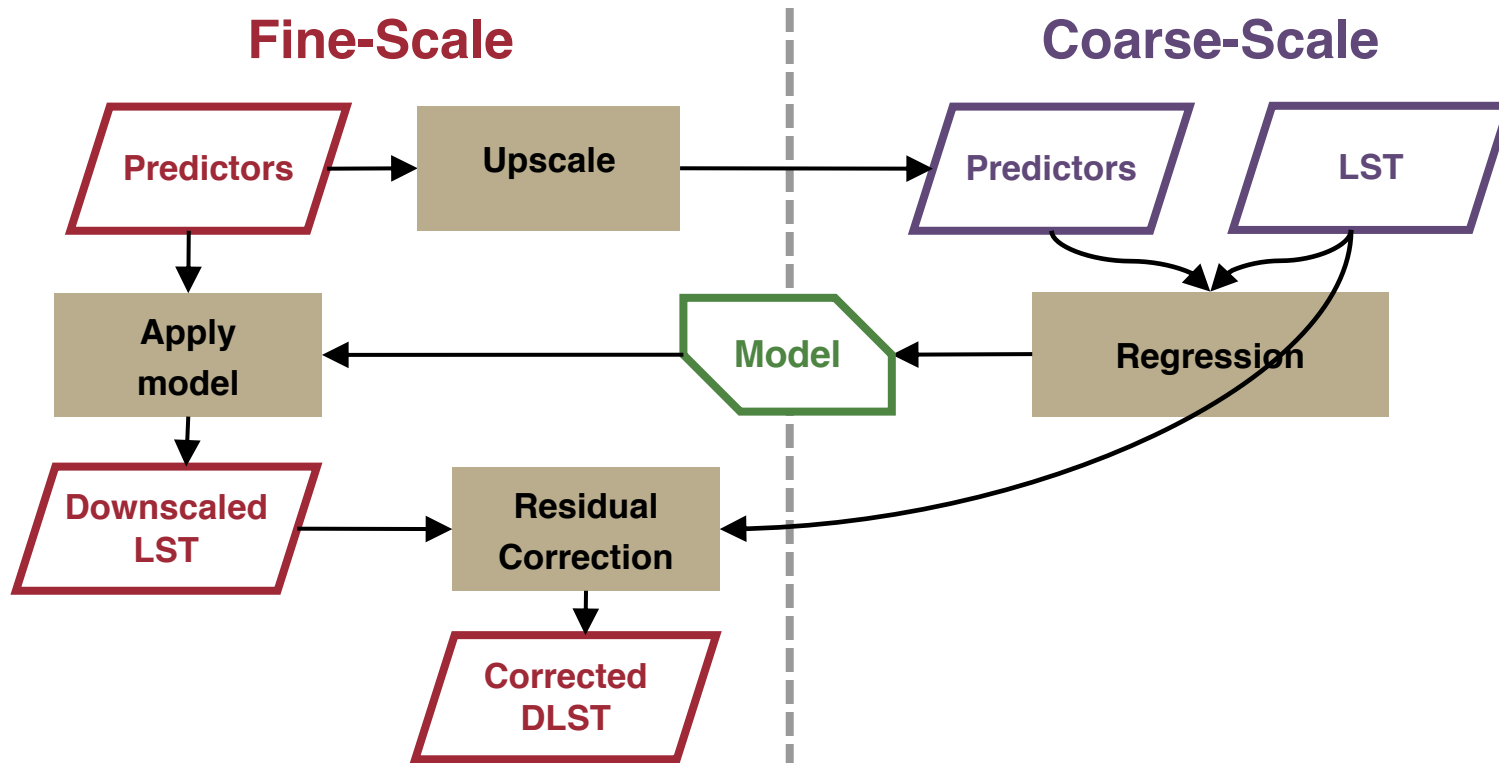

It uses auxiliary data of **superior** spatial resolution are statistically correlated to the LST

Chen et al., 2014

LST predictors  
or  
LST disaggregation Kernels

# Typical Workflow

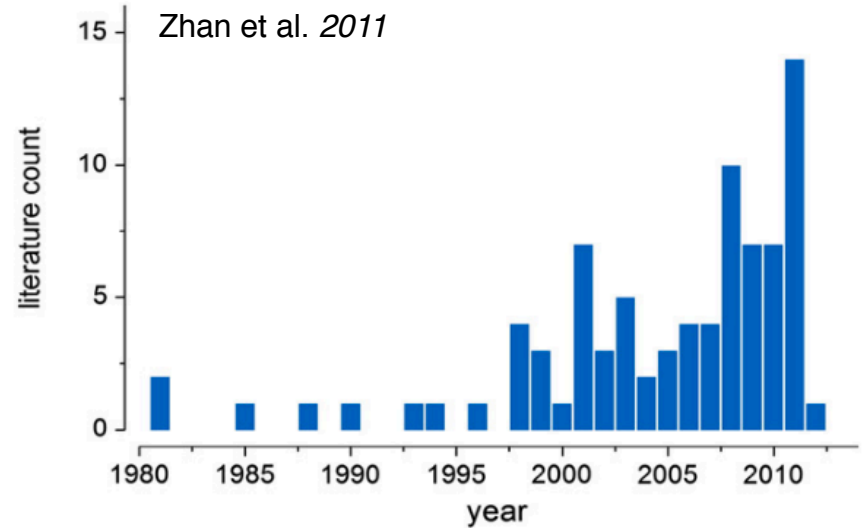

# State-of-the-Art

One of the “*hottest*” topics in TIR RS.

4 km / 1 h → 1 km / 1 h

1 km / daily → 100 m / daily

# Study Case

Athens Greater Region, Greece

0.05 deg / 15 min SEVIRI LST

1-August-2018 to 30-September-2018

**Target: 100 m / 15 min**

# Predictors

**LS-8 NDVI**

**LS-8 Albedo**

**ECOSTRESS LST**

**SRTM DEM**

**LS-8 MAST**

**LS-8 Theta**

**LS-8 YAST**

# Preprocessing

Resampling

PCA transformation

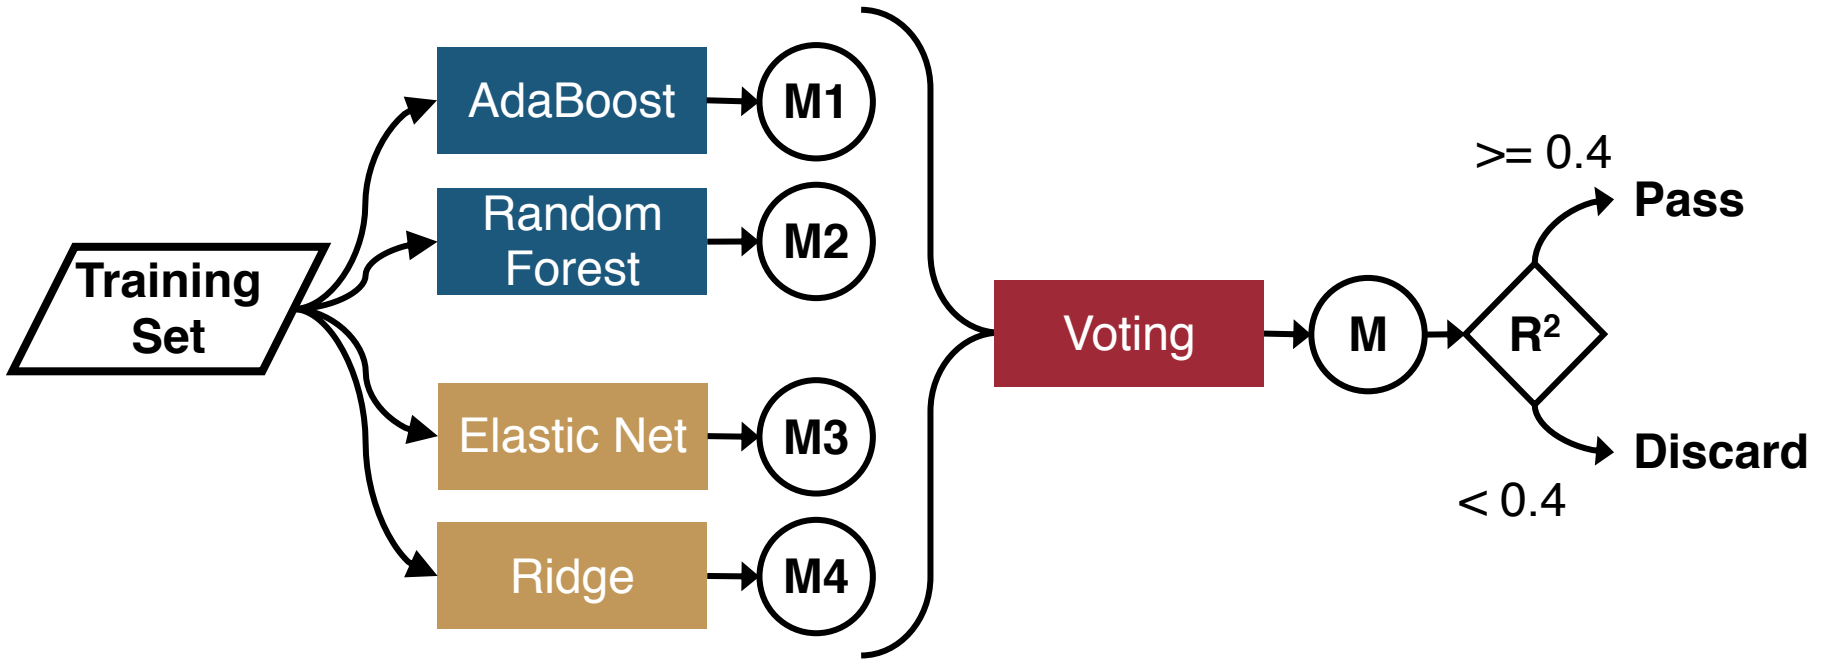

Standardization

# Regression

# Tuning the hyper-parameters

Define  
parameter  
space

70% - 30%  
Split the data  
randomly

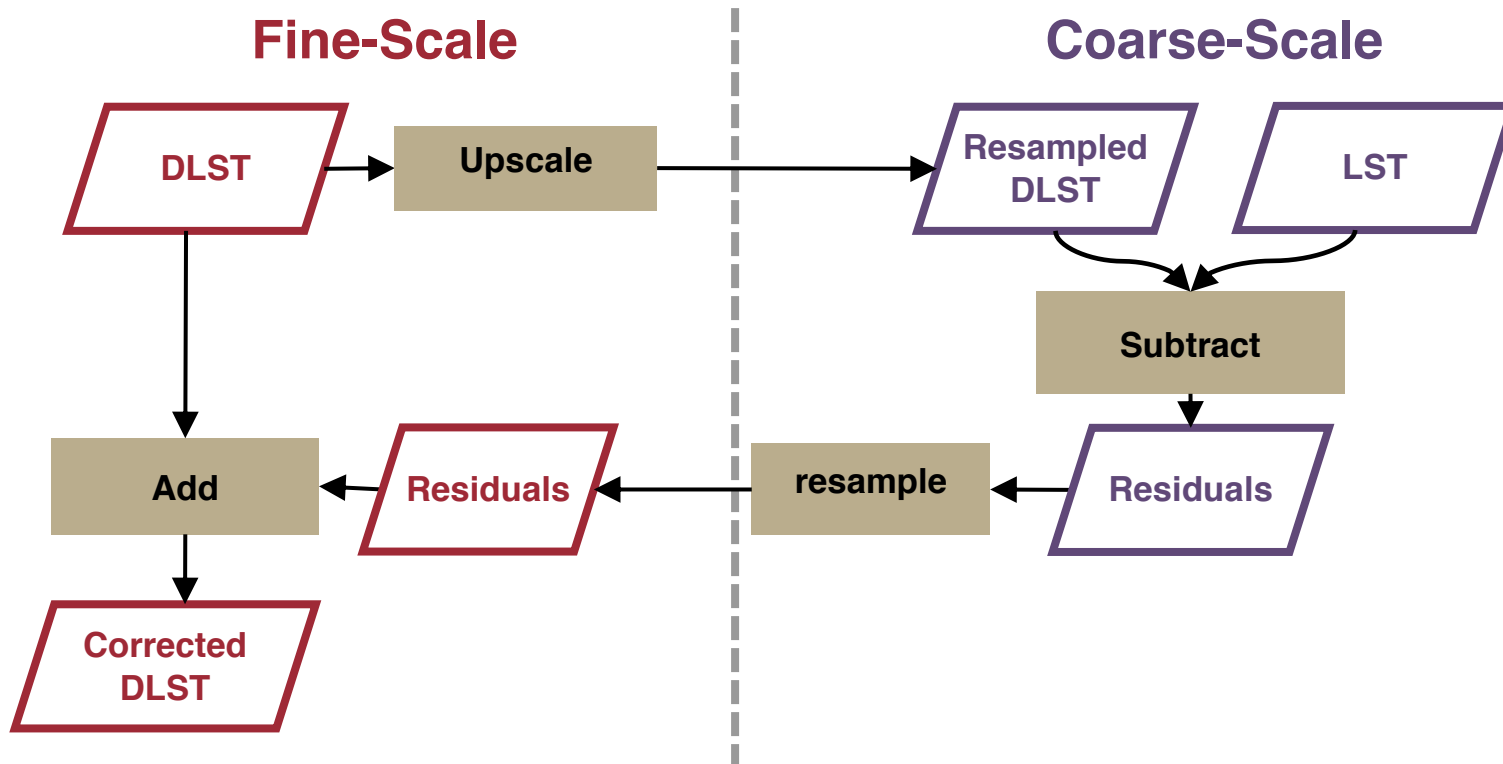

10-fold  
cross  
validation

R2 Scores

4 x 5 km SEVIRI LST (C)

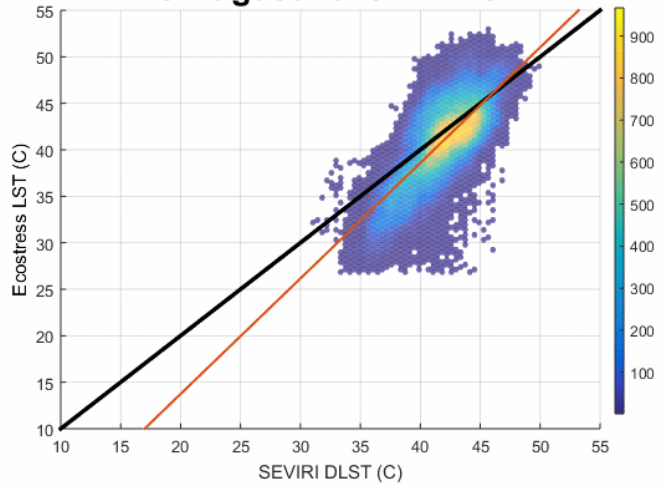

100 m SEVIRI Downscaled LST (C)

**RMSE = 1.8°C ± 0.4°C R2 = 0.65 ± 0.08**

8 August 2018 - 11:49

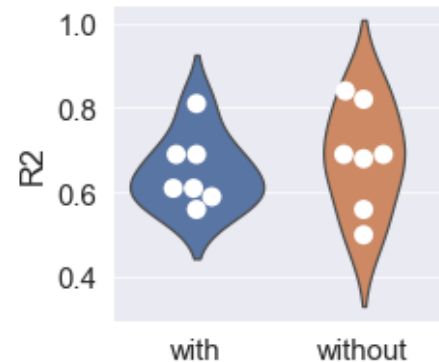

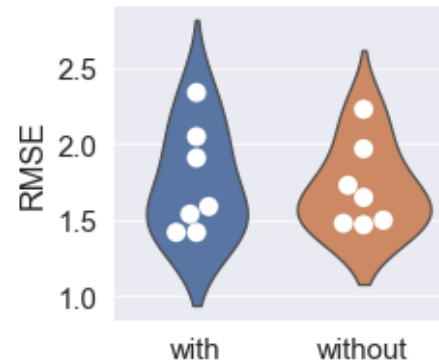

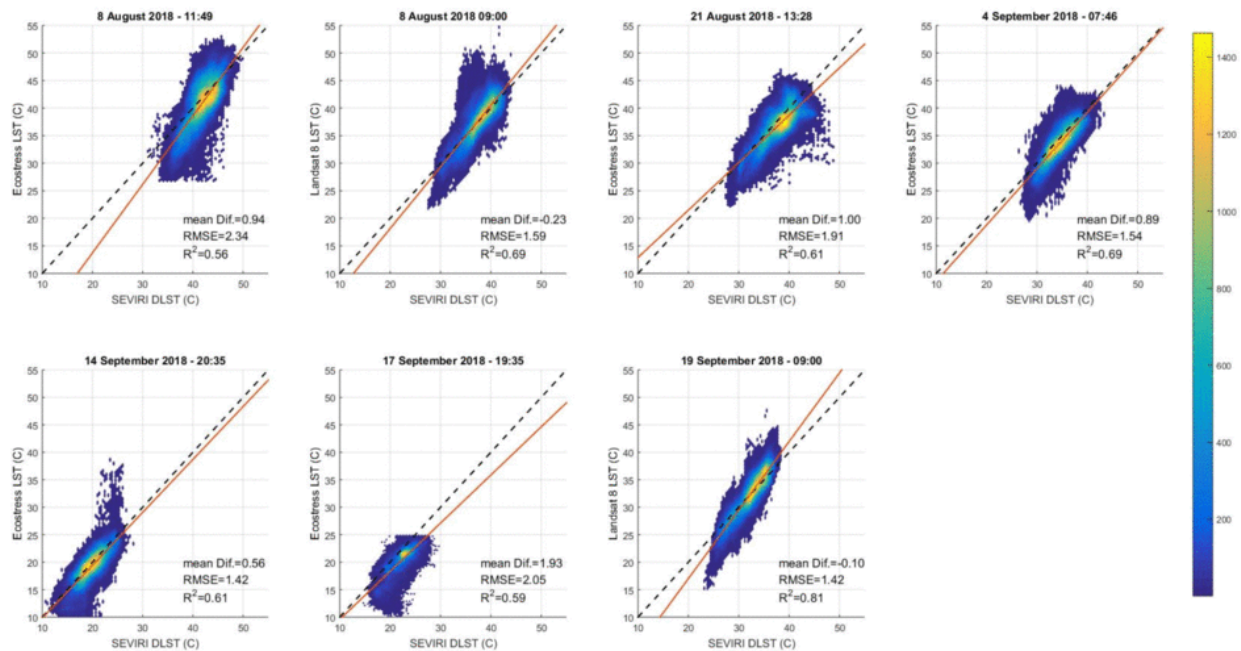

The Diurnal DLST cycle for the point noted with the \* symbol in the DLST image

# Residual Correction

## With Residual Correction

# Concluding Remarks

We need predictors that can describe the synoptic weather conditions.

We need better predictors for nighttime data.

We need a more sophisticated residual correction method.

You can get the  
downscaling code from  
github @**pansism**

## Thank you!

This work received funding  
from the H2020 ATLAS project.
